

Index	Question
01	How to check if an object is an Array or not with and without using inbuilt methods? With the help of suitable code.
02	Write a JavaScript program where the program takes a random integer between 1 and 10, and the user is then prompted to input a guess number. The program displays a message "Good Work" if the input matches the guess number otherwise "Not matched".
03	Write a JavaScript program to check a pair of numbers and return true if one of the numbers is 50 or if their sum is 50.
04	Write a JavaScript program to set paragraph background color.
05	Write a JavaScript program to delete the rollno property from the following object. Also print the object before or after deleting the property. <pre>var student = { name : "Rayy", class : "VI", rollno : 12 };</pre>
06	Write a JavaScript program to display the reading status (i.e. display book name, author name and reading status) of the following books. <pre>var library = [{ author: 'Bill Gates', title: 'The Road Ahead', readingStatus: true }, { author: 'Steve Jobs', title: 'Walter Isaacson', readingStatus: true }, { author: 'Suzanne Collins', title: 'Mockingjay: The Final Book of The Hunger Games', readingStatus: false }];</pre>
07	Write a simple JavaScript program to join all elements of the following array into a string. <i>Sample array</i> : myColor = ["Red", "Green", "White", "Black"]; <i>Expected Output</i> : "Red,Green,White,Black"
